Q1. PROPOSAL DESCRIPTION

Provide a brief abstract of the Proposal. Please note if the Proposal will facilitate or support the participation of DAC's in the IRWM planning effort.

The existing CABY IRWMP was adopted by the group in 2007. Updating the plan (as stipulated in the 2007 adopted plan) began in mid-2008. These ongoing plan updates were initially focused on integrating new projects on an annual basis. However, the scope of the updates expanded to include anticipated guideline requirements and published guideline requirements in 2009 and 2010. The CABY Regional Water Management Group (RWMG) performs annual self evaluations above and beyond evaluating and monitoring plan implementation. In the most recent self-evaluation, which directly informed several key aspects of the Workplan, the group determined that outreach to several key constituencies needed to be enhanced; the existing plan needed to be completely reformatted to reduce the cost and complexity of printing; and the significant body of new data generated by three regional Federal Energy Regulating Commission (FERC) relicensing efforts, the group's strategy for assessing regional adaptive strategy in response to climate change, ongoing project development, and a development of diversified funding strategy were important issues for consideration in 2011. Finally, the RWMG has determined that a reevaluation of the key water management issues will need to include considerably more coordination with and outreach to regional water agency boards of directors, county boards of supervisors, city councils, and land use management agencies.
